

HORTICULTURE

Flowering Light

PRODUCT DESCRIPTION

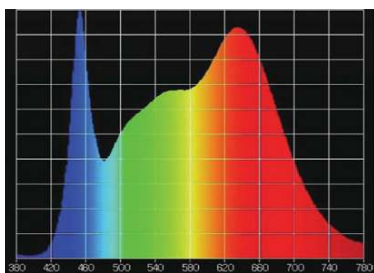

The 600W LED grow light covers a 1200 X 1200mm space for flowering while only using 600w. While this LED grow light is designed for high-intensity flowering, it can also be used for full-cycle grows.

The fixture is comprised of two separate units, each drawing around 300W. The separated units allow you to adjust the lights up or down as needed or closer or farther apart depending on the intensity that your grow requires.

Each disk (10 total) draws around 60W and contains its own integrated driver.

The passively-cooled disks negate the use of active cooling fans to cool the fixture.

5-YEAR
WARRANTY

Units in $\mu\text{mol} / \text{m}^2 / \text{s}$ (i.e. PPF = Photosynthetic Photon Flux Density)

TECHNICAL SPECIFICATIONS

Product Code	PL-GF600W
Power	600W
Lifespan	50,000 Hours
Input Voltage	240V
Certifications	ETL, SAA, CE, DLC, RoHS
Warranty	5 Year
IP Rating	IP66
Spectrum	Full Spectrum
Efficiency	2.3 $\mu\text{mol}/\text{j}$
Dimensions	1016Lx203Wx70Hmm x2
Weight	13.7kg
Mounting Height	600mm above canopy
Ideal Replacement	1000W Dbl Ended MH/HPS
CRI	≥ 93
Coverage Area	1200mm x 1200mm
